*Cost/Gallon is determined by multiplying $\$1.815 \times 10^{-6}/\text{mg/L}/\text{Gallon}$ by the upper limit on the mg/L range column.

The minimum cost for all accepted waste will be \$0.027 as of 2023. Rates are adjusted on 6-12 month TS (%) averages for each permit.

NOTE: Normal septic waste averages 20,000 mg/L.
Normal holding tank waste is >1,000 mg/L and <5,000 mg/L.
