

Monthly Management Report
CRW Directors and Staff

May 2023
As of June 21, 2023
Page 1 of 8

Ensure Financial Stability	
Reconciled Bank Account Balances	Refer to attached Reconciled Bank Account Balances as of 5/31/2023.
Monthly Financial Statements	Provided separately to Board of Directors.
Monthly Financial Dashboard	Provided separately to Board of Directors.
AP Check Reconciliation Register	Provided separately to Board of Directors.
Capital Improvement Projects for Drinking Water	Provided separately to Board of Directors.
Capital Improvement Projects for Wastewater	Provided separately to Board of Directors.
Grant Management	Refer to attached Grant Management Report.
Ensure Revenues are Consistent with System Usage	
Water Shut-offs	There were 31 water shut-offs for non-payment, and 48 service shut-off requests.
Repair/Replace Meters/MXUs/Batteries	Drinking Water Distribution staff replaced 18 water meters, replaced 80 batteries, and 34 MXUs.
Reduce Wet Weather Impacts to Infrastructure, Community, and Receiving Waters	
Negotiate with PADEP/U.S. EPA/DOJ on Past and Future Practices	No update.
Develop Necessary Planning for Implementation of Green Infrastructure	<ul style="list-style-type: none"> Phase 4 Stormwater Pro-Fi construction will commence at the beginning of July, starting with the Boys and Girls Club GSI. Design and planning for next phase of GSI (2024-2027) is underway.
Joint Pollutant Reduction Plan - Collaborate with Suburban Partners on MS4	The Paxton Creek Cooperative is actively working with PennDOT's vendor on the construction contract to determine a final change order to secure the additional sediment reduction required for the 2020-2025 Permit cycle.
Obtain and Comply with Individual MS4 Permit	No update.
Operate Facilities with a High Standard of Care	
Permit Compliance	<p>The Drinking Water department met all primary and secondary Safe Drinking Water Act permit parameters for the month of May.</p> <p>The AWTF met all NPDES permit parameters for the month of May. One Dry Weather Overflow was reported. Details can be found in the AWTF Monthly Report for May.</p>
Notice of Violations (NOVs)	<p>There were no NOVs received by the Drinking Water department in May.</p> <p>On 5/2/2023 CRW received a Notice of Violation (NOV) from PADEP regarding events associated with the Front Street Interceptor Rehabilitation Project. On 3/21/2023, a project contractor was attempting to relocate an active sewage bypass pipe when the pipe union broke and caused approximately 13,250 gallons of sewage to discharge to the surrounding grounds. An estimated 3,200 gallons of that discharge made its way by gravity to the Susquehanna River. There were additional incidents of illicit discharge of petroleum products on 3/24/2023, 3/30/2023 and 4/27/2023. All incidents were reported to PADEP immediately. On 5/17/2023 CRW provided a comprehensive NOV response letter that detailed corrective actions and preventative measures taken by the project team to prevent similar incidents from occurring during the remainder of the project schedule.</p>

<p>Asset Management</p>	<p>Roadmap Implementation activity report:</p> <p>Decision Making Capital Planning Roadmap Implementation Group (RIG)</p> <ul style="list-style-type: none"> • Meetings held 5/22/2023 and 6/2/2023 to finalize draft design and construction contract language that defines the asset management data responsibilities and deliverables. <p>Information System Data Management Roadmap Implementation Group RIG</p> <ul style="list-style-type: none"> • Facilitated training sessions 5/31/2023 and 6/1/2023 on CMMS updated workflows to support industry benchmarking and performance management. <p>Operations & Maintenance Roadmap Implementation Group RIG</p> <ul style="list-style-type: none"> • AWTF inventory and condition assessment task held meetings on 5/26/2023 and 6/2/2023 to develop data collection process and perform field testing at the plant on 6/9/2023. • Data cleaning efforts continue for the Collection Asset Management Plan, completion due 6/30/2023. Plan workshops held 5/25/2023, 6/8/2023 and 6/15/2023. <p>Organizational Framework Roadmap Implementation Group RIG</p> <ul style="list-style-type: none"> • Preliminary preparation for Roadmap Development Team meeting under way. <p>██ ██</p> <p>Other Activities</p> <ul style="list-style-type: none"> • Dashboard development group met 5/19/2023 and 6/5/2023 with focus on collection system performance indicators. • The Lead Service Line Inventory working group status report meeting was held on 5/16/2023. • Collaboration with Safety and Risk Management to develop incident tracking in the Computerized Maintenance Management System (CMMS) and emergency response plan for North Front Street facility. • Coordinate American Water Works Association (AWWA) Benchmarking survey edits and submittal on 5/31/2023.
<p>Development Review Summary</p>	<p>For details, see attached Development Stormwater Management Review Summary spreadsheet for May.</p>

Undertake Capital Improvement Projects - Refer to attached Capital Improvement Projects Report	
Professional & Contractor Services	<p>Recommend Board approval of the following Resolutions, Task Orders, Change Orders and Agreements:</p> <p>Drinking Water:</p> <ul style="list-style-type: none"> • 2023 Street Restoration Project - Recommendation of Award [REDACTED] • Timber Product Harvest/Sale - Recommendation of Award [REDACTED] <p>Wastewater:</p> <ul style="list-style-type: none"> • Task Order 2020-14-02: Engineering Services for City Beautiful H2O Program Services [REDACTED] • Task Order 2023-08-02: Engineering Services for CBH2O Program Services – Water Quality Services [REDACTED] • Task Order 2023-12-01: Engineering Services for 2024 Sewer System Improvements [REDACTED] • Change Order No. 1 - Front Street Interceptor Rehabilitation Phase 2 Project [REDACTED] • Interconnection Agreement and Transaction Confirmation [REDACTED] • Inflation Reduction Act Assistance [REDACTED] <p>Stormwater:</p> <ul style="list-style-type: none"> • Resolution No. 2023-010 Authorization for Contribution Agreement with PennDOT for I-83 Expansion Project – Supplement Improvements
Stormwater O&M Agreements	Recommend Board approval of the following: None.
AWTF Primary Digesters Rehabilitation	Closeout of all contracts is anticipated in July 2023.
AWTF Energy Recovery Improvements	Refer to the agenda for recommendation of the Interconnection Agreement and Transaction Confirmation with UGI Energy Services.
Front Street Pumping Station Improvements	Contract No.1 (General Construction) is expected to be closed out in July 2023.

Undertake Renewal and Replacement Projects	
2022 Water System Improvements	Installation of water main continues in the Sylvan Terrace neighborhood. The project is expected to be complete in Fall of 2023.
Cameron Street Water Main - Phase 4	A preconstruction meeting was held on 6/13/2023 and work is expected to begin in late July.
2023 Sewer System Improvements (Excavation)	The contractor continues construction with inlet replacement along 15th Street.
2023 Sewer System Improvements (Trenchless)	The contractor has rehabilitated several manholes.
Arsenal Boulevard Sewer	No update. We are working with property owners to acquire temporary and construction easements needed before advertising the project.
Front Street Interceptor Rehabilitation Phase 2	The contractor has cleared the lower phase (Forster Street to I-83) and is now setting up bypass piping between Forster Street and Seneca Street for the cured-in-place piping (CIPP) lining in July.
Water Facility Maintenance	Drinking Water Maintenance staff performed repairs to various process units as described in the Drinking Water Department Monthly Report for May.
Wastewater Facility Maintenance	The Wastewater Maintenance group completed various repairs throughout the AWTF, pumping stations, and at the North Front Street offices throughout the month. A narrative is provided in the Wastewater Department Monthly Report for May
Sinkhole Program	Three (3) sinkholes were investigated by CRW in the month of May. One (1) was due to failure of a wastewater asset.
Inlet Cleaning	A total of 282 stormwater inlets were cleaned during the month of May, and 252 stormwater inlet inspections were performed.

Operate as an Efficient, Sustainable and Resilient Water Utility	
DeHart Property Stewardship	In accordance with the DeHart Property Forest Management Plan, a regeneration harvest is underway in MUs 20, 34, 36, and 37 (approximately 155 acres). Harvest will improve forest health and release regeneration of a more desirable understory. A timber harvest and sale agreement for MU 40 and 42 is recommended for award. Harvest will remove overstory and release regeneration. <i>Please see related Issue Brief.</i>
Sustainability	No update.
Internal Communications	Intranet (Sharepoint) site continues to be used. The Q2 All Employee Meeting is scheduled for 6/28/2023.

Inform and Listen to Customers and Encourage Stewardship of our Systems

capitalregionwater.com

Plant Operations

Capital Region Water's (CRW) Drinking Water department met all Federal Safe Drinking Water Act water quality standards for the month of May.

Specific water quality results are summarized in Exhibit A. A total of 225.428 MG, averaging 7.272 MGD was withdrawn from the water supply source for treatment. As shown in Exhibit B, a total of 222.53 MG, averaging 7.178 MGD, of finished drinking water was pumped to the distribution system.

The DeHart water source was in service for 31 days. The Susquehanna River water source was in service for zero days.

The DeHart Watershed had below average rainfall in May (Exhibit C) and the DeHart Reservoir water level slightly increased (Exhibit D). An estimated 1149.45 MG of water was released from the DeHart Reservoir to Clark Creek, averaging 37.08 MGD for the month. This downstream flow, which is received by remote flow monitoring from the weir location and actual staff gauge readings, met the flow required by the State Water Allocation Permit (Exhibit E).

Plant Maintenance

The Maintenance team performed approximately 72 preventative maintenance work orders and corrective maintenance work orders for the month of May using the Cityworks maintenance management system for all water treatment plant equipment, pumping stations, and fleet vehicles.

- The DeHart Dam watershed was patrolled daily and maintained.
- Repaired wiring issues with Caustic Pump 613C and 613A.
- Removed the old caustic system that is not in use.
- Installed emergency lighting and exit signs in the finished water pump houses.
- The new Aluminum Sulfate Chemical Injection system is currently under testing for commissioning and PADEP approval.
- Installed sample piping for the clearwell(s) C-17's per PADEP request.
- Continue to finish the wiring system and components for the new Lime Slurry Chemical feed system with the assistance of sewers' electrical group.
- Continued to label various instrumentation and electrical panels and disconnects throughout the plant.

-
- Perform spring/summer landscape duties at the Water Services Center, Front Street pump houses, DeHart Dam facility and the North Front Street administrative offices.
 - Complete maintenance of fleet vehicles and equipment.

Distribution

The Distribution group completed the following work during the month of May:

- Repaired four leaking services during the month of May totaling 95,040 gallons of unmetered water.
- Repaired one water main break – 109,685 gallons of unmetered water.
- Completed 394 work orders.
- Completed 497 water, sewer, and stormwater locates.
- Hydrant flushing was completed at the end of May with 995 hydrants flushed during the month.
- Worked with contractors on several water, sewer, and stormwater Capital Improvement projects.

Water Quality

In addition to overseeing the operation of both the accredited and process laboratories, the Water Quality Administrator also:

- Ensured collection of monthly regulatory samples for Total Coliform, and E. Coli.
- No taste or odor complaints.

WASTEWATER DEPARTMENT MONTHLY REPORT

Rail fabrication for Primary Clarifier No. 4 continues.

May 2023

1662 South Cameron Street, Harrisburg, PA 17104 | 888-510-0606
capitalregionwater.com

Overview

The Wastewater department continued working to implement the Chlorine Auto-Feed system throughout May. Several adjustments to the sampling system were made, but reagents required for operation were on backorder. Those reagents have since been received and fine-tuning of the instrumentation is now being finalized.

Plant Operations was also focused on continuing its recent run of excellent effluent nitrogen concentrations. Warmer process temperatures are optimal for biological nitrogen removal. Operators and lab personnel are hoping to use the summer to recover from higher effluent numbers experienced in the winter to increase the generation of nitrogen credits for sale in the fall.

Field conditions for farm application of biosolids continued to be favorable in May, allowing for disposal at our lowest cost options. High diesel prices continue to cause elevated hauling costs, but tipping fees at farm sites are by far the most favorable.

On May 2, 2023, CRW received a Notice of Violation (NOV) from PADEP regarding events associated with the Front Street Interceptor Rehabilitation Project.

- On March 21, 2023, a project contractor was attempting to relocate an active sewage bypass pipe when the pipe union broke and caused approximately 13,250 gallons of sewage to discharge to the surrounding grounds. An estimated 3,200 gallons of that discharge made their way by gravity to the Susquehanna River.
- There were additional incidents of illicit discharge of petroleum products on March 24, March 30, and April 27. All incidents were reported to PADEP immediately.
- On May 17th, CRW provided a comprehensive NOV response letter that detailed corrective actions and preventative measures taken by the project team to prevent similar incidents from occurring during the remainder of the project schedule.

Operations

During the month of May, the AWTF met all monthly average NPDES permit requirements. One Sanitary Sewer Overflow (SSO) and two Dry Weather Overflows (DWO) were reported.

Hydraulic loading to the AWTF averaged 20.3 million gallons per day (MGD). The treatment process achieved removal reductions of 98.4 percent CBOD, 97.5 percent Suspended Solids, 59.0 percent Phosphorus, and 97.0 percent Ammonia (Exhibit A).

The Contract Waste Hauling program collected \$77,689.95 in revenue from 1,540,820 gallons discharged (Exhibit G). This was the highest monthly revenue generated by the program since March 2021. Modern Landfill discharged over half a million gallons of leachate even though rainfall was minimal in May. The increase in revenue was driven by increasing their discharge rate now that we have six months of total solids data to substantiate that action.

The Cogeneration Facility experienced an average run time of 38 percent in May. Revenue is estimated at \$7,832.78 on 53,100 Kilowatt-hours generated for the month.

Laboratory

- Finished inputting all bench sheets with calculations in WIMS. Set up training for June.
- Had supplemental assessment with DEP for the new fecal coliform and E. Coli method, received assessment report and are working on all necessary updates.
- Set up account with Aquatic Informatics for Aquatic Academy (a training program for WIMS and Rio).

Pretreatment

- Submitted final inspection response to EPA addressing a majority of the findings they mentioned in their report.
- Finished reviewing first quarter SMR data from industrial users now that all the data has been submitted.
- Identified a possible new CIU in Durabond which is located off Cameron Street in Steelton. They are considering installation of a pretreatment process and requested guidance on effluent limits and other information on the reporting process that they would need to abide by.

Plant Maintenance

- Completed annual fire extinguisher facility inspections.
- Clearing debris from facility in preparation of plant open house.
- Tested check valves for proper operation of hydraulic pumps at the Front Street Pump Station.
- Serviced standby generator full load test at Market Street and Spring Creek Pump Stations.
- Repaired sump pump and cleared pit blockage at the Pista Grit.
- Tested pump performance with manufacturer and completed worksite pump replacement at the Plant Drain Pump Station.
- Staff continued welding and replacing return rail for Primary Collection System No. 4 at the Primary Clarifier.
- Continued installing new secondary conveyance collection systems at the Primary Clarifier.

-
- Repaired discharge chute deflector plate hinge and guide assembly at the Spring Creek Pump Station.
 - Completed annual fire extinguisher repair or replacement in all vehicles.
 - Performed vehicle repairs in preparation for state inspections.
 - Provide weekly maintenance on JCB Loader.
 - Performed daily service for vehicular related repairs such as bulbs, batteries, tires, lube oil and filters, and flat tires.
 - Performed maintenance tasks at 3003 North Front Street, as requested.

Field Construction

- Repaired 29 inlets in various location throughout the city.
- Blanked five inlet backs in various locations throughout the city to combat debris from entering the system.
- Replaced an inlet lateral at Fourth and Reily Streets. This line was causing a sinkhole on Fourth Street. Twenty feet of damaged VCP was replaced with new SDR.
- Replaced an inlet lateral at Green and Sayford Streets. Removed 12 feet of broken VCP and replaced it with new SDR.
- Repaired the weir at Front and Mulberry Street CSO. The weir was reported to us by contractors lining the Front Street Interceptor.
- Repaired the weir at Muench Street CSO.
- Replaced the weir at Front and Reily Streets. The old weir was made of wood and coated with concrete. It was replaced with a new concrete weir that is reinforced with rebar.

Field Operations

- Performed CCTV assessment of 7,509 (1.42 miles) of pipe.
- Flushed 3,196 feet (0.61 miles) of sewer pipe.
- Responded to seven backup and overflow calls. None were the responsibility of CRW.
- Responded to three sinkhole calls. CRW was liable for one.
- Cleaned 282 inlets.
- Inspected 252 inlets.
- Completed three CSO semi-annual PM's.
- One Dry Weather Overflow (DWO) occurred this month at CSO #013 Front and Cumberland.
- Cleaned center column of Thickener No. 2.

Environmental Compliance

- Completed three inspections of FOG dischargers.
- Renewed two FOG discharge permits.

-
- Provided education packet to one newly identified FOG dischargers (either new business or previously unidentified). Spent time educating business owners/representative and provided them with a FOG Best Management Practices Manual, copy of Section 7.5 of the updated Wastewater and Stormwater Rules and Regulations, discharge permit request, cleaning log sign-off sheet, and introduction letter.
 - Issued two non-FOG related NOVs.
 - Two investigations were conducted during the month of May:
 - Environmental Compliance received a report of an illicit discharge of milk products to Spring Creek. An investigation quickly confirmed the source as a business along 29th Street. The business was ordered to coordinate cleanup with a local contractor and a NOV was issued. A follow-up meeting to educate staff was conducted the following week.
 - Environmental Compliance responded to a report of raw wastewater flowing/being pumped into a storm inlet in the vicinity of Sixth and Curtin Streets. An investigation confirmed wastewater was improperly being discharged because of a malfunctioning sewer lateral. The responsible party was issued an NOV.

Street Sweeping

- Received two complaints this month.
- Completed 687.27 miles of scheduled street sweeping within the City of Harrisburg.
- Water usage was approximately 11,800 gallons this month.
- Continued to assist cleaning storm inlets in schedule sweeping area.
- Replaced Main Brooms on all sweepers.
- Performed much-needed replacement of front tires on all three Sweepers.
- Performed 1,000-hour service on SW2 and SW1.
